

QUALITY POLICY

Established in 1990, **Nylastex** is committed to providing plastic injection moulds, precision machining and manufacturing of special purpose built equipment to the mining, agricultural, defence, transportation, automotive and renewable energy industries. **Nylastex** also manufactures engineered and prefabricated, energy efficient modular houses that are durable, low cost and low maintenance.

We pride ourselves on providing services that meet our Client's criteria and specifications.

Our services are delivered by meeting the appropriate Australian Standards, applicable statutory and regulatory requirements.

Our management systems are compliant to ISO 9001:2015 Quality Management Systems and are integrated with Work, Health and Safety Management Systems.

With quality of product and service at the forefront of our Company's objectives, our primary goal is to satisfy our Clients' needs through the provision of:

- employing a skilled, experienced and stable workforce
- regularly up-skilling our workforce
- determining, reviewing and addressing risks and potential opportunities
- setting, reviewing, integrating and updating our quality objectives
- meeting the Client's specification
- promoting and maintaining safety programs throughout the business
- a rigorous approach to reviewing and updating our systems
- endeavouring to improve the capability of our processes
- enlisting the full participation of each employee in our quest for excellence
- expecting our suppliers to make commitments to quality improvement
- effective communication between management, staff, Clients and stakeholders
- formal and informal Client feedback mechanisms
- developing long term Client relationships
- an environment that reflects a culture of effective leadership, commitment to continuous improvement and innovation.
